TO NEW OPPORTUNITIES

PROFESSIONAL SUMMARY

Full-stack software engineer with experience designing and delivering business-critical web applications, with a particular passion for modern frontend development and user experience. Enjoys building maintainable, accessible software that balances technical performance with intuitive design, and is motivated by finding practical ways to improve systems for both users and developers.

At NZX, I was a primary developer for the redevelopment of multiple external platforms, created a shared React component library, and worked across the full stack to deliver reliable, long-term solutions.

I am looking to continue growing as an engineer by contributing to collaborative teams while expanding experience in architecture, technical leadership, and AI-assisted development.

EXPERIENCE

Full Stack Developer *Jun 2023 — Present*

NZX Energy Markets — Wellington, New Zealand

- Primary developer responsible for rebuilding three production platforms: WITS, Clearing, and Reconciliation.
- Modernised legacy Oracle APEX and Ruby applications into a React and Node.js architecture.
- Designed and developed an accessible shared React component library, including reusable UI components, a configurable data table, and a flexible D3 charting framework.
- Improved application performance and usability by redesigning data-heavy interfaces, optimising SQL queries, and introducing UX-focused enhancements that simplified navigation for market participants.
- Worked across the full software development lifecycle in a small engineering team, taking ownership of frontend architecture, backend development, bug resolution, and ongoing platform enhancements.
- Collaborated closely with Energy Ops and developers to deliver reliable software while translating technical requirements into intuitive user experiences.

Technologies: React, TypeScript, Node.js, Oracle SQL, Oracle APEX, Ruby on Rails, D3

Analyst Developer *Feb 2022 — Jun 2023*

FNZ — Wellington, New Zealand

- Contributed to enterprise wealth management platforms within a cross-functional team of around 15 developers and testers.
- Worked with an international team of developers in Europe, collaborating on backend systems.
- Focused primarily on backend development, building and maintaining financial data pipelines and investment processing services.

Technologies: C#, Visual Basic, PostgreSQL

Real Time Operator *Dec 2017 — Apr 2020*

NZTA — Operations Centre — Wellington, New Zealand

- Handled active state highway incidents and coordinated responses across the North and South Islands as part of a 4-person real-time operations team.
- Monitored and controlled a large CCTV network spanning from Lake Taupo to Lewis Pass.
- Operated critical infrastructure such as the Mt Victoria and Terrace tunnels, and worked with road infrastructure contractors to manage lane closures and traffic diversions.
- Coordinated with traffic management contractors and communicated directly with NZ Police by radio during incidents and vehicle pursuits.

Technologies: Operations, Incident Management, Infrastructure

SKILLS

Frontend Engineering

React · TypeScript · Next.js · CSS · D3.js · Accessibility · UX

Reusable Systems

Component Libraries · Accessibility · Design Systems · UI Architecture · Developer Experience

Application Development

Node.js · Express · Oracle SQL · PostgreSQL · Ruby on Rails

Engineering Practices

Git · Docker · Podman · GitHub Actions · Dev Containers

EDUCATION

Bachelor of Science, Computer Science

Victoria University of Wellington — Graduated 2022

UX Microcredential

Media Design School, Auckland (Online) — Grade: A-
